

# FirstBIKE

## FirstBike – the essential strolling bike

### Quality Designed in Germany

FirstBike features the highest quality materials and parts. Educational benefits, style and great fun are why FirstBike is first choice for toddlers and parents worldwide.

### Education

FirstBike gives children a head start. Experts agree that through the development of balance, gross motor skills and a sense of independence, children are given the confidence they need for further success, both socially and in the classroom.

### Materials

FirstBike is both durable and safe. The high quality composite frame is designed to minimize risk and maximize comfort. Unlike wooden or metal equivalents, FirstBike will not swell, scratch, splinter or rust.

### Growth

FirstBike grows with your child. The innovative lowering adapter allows children to ride from as young as 22 months. The fully

adjustable seat and FirstBike's durability and reliability enable children to enjoy riding up to 5 years of age.

### Award Winning

Winner of toy awards across Europe, FirstBike can be enjoyed in the home, at the park and is an ideal travelling companion on walks. For boys and girls, FirstBike is the essential educational toy.

### Safety Stop

SAFETY STOP is the adequate and precise rear drum brake. It gives the child optimal control over the FirstBike and promotes the training of bike handling skills.

### Lightweight! weighs only 3.5 kilograms

Weight with drum brake 3.9 kilograms. Length 84 cm, width 36 cm, height 56 cm, wheelbase 54 cm.
