

MERIDA CROSSWAY means endurance, comfort and functionality – your way to two wheeled freedom on and beyond the road! Regardless of whether it's a short trip around your neighbourhood or extensive bike touring – our CROSSWAY is your trusty and reliable companion!

Without doubt, its versatile character is this bike's key strength: Thanks to lightweight but extremely solid aluminium frames, our CROSSWAYs are very rugged. Up to 63 mm front suspension travel allows for adventures on gravel and fire roads. To assist with rider comfort over rough terrain and deep potholes, all models come equipped with suspension seat posts!

Simultaneously, its multifunctional character ensures this MERIDA series also excels on paved surfaces: Due to larger 700c wheels with semi-deep tyre tread, our CROSSWAY rolls smoothly on roads and bike paths. The 27 and 24 speed shifting systems offer enough gear reserves for the most challenging ascents. Our CONE HEAD head tube always guarantees precise steering, superior tracking and swift changes of direction. Last but not least: Powerful disc brakes on all TFS models provide outstanding braking safety in every situation.

A brilliant crossover of on and off road qualities – MERIDA CROSSWAY!
